Hi Margaret.

Your proposal to cap the site with 12" of soil over a demarcation layer would be acceptable.

Thanks.
Justin

Subject: Columbia Smelting/Red Hook Ball Fields - Question on Capping

Hi Justin and Stephanie,

For the Columbia Smelting & Refining Works Site/Red Hook ball fields that we discussed in early February, would capping the site with 12" of soil, as opposed to removing 12" of soil and replacing it with clean fill, be acceptable to NYSDOH? There would be visible demarcation of the contaminated soils.
